

## Abstract

In the poster I will be presenting, it will contain how the Zapotecs would bury their family. It will talk about where they were buried, why they were buried there, the positions the bodies were in when placed in their grave, and much more. Such as, how the Zapotecs would bury their family members under their houses or just a little way away from the house. There is also an area that the Zapotecs lived in for a while known as Mitla, where many people were buried underneath.
