

NWC Equine Program- Spring 2024

A few students from the equine program put together a few posters that show what some of the classes in the equine program are like and what you can learn. The posters will highlight field trips and things learned by the students in the equine program in the last two years and include when the judging team went to and competed at a world competition and won reserve champion as a team. The purpose is to show what the equine program is like and some of what you can expect to learn going into it. It is a very unique program that is hands-on and provides students with a lot of opportunities in the equine industry.
